

ENVIRONMENTAL STUDIES COURSES (ENST)

ENST 210

HUMAN DIMENSIONS IN NATURAL RESOURCES (4)

Prerequisites: ENVS 101, 101L and 102, 102L. This course provides an introduction to the various dimensions of human interaction with our natural resources. Topics include environmental management, economics, law, policy, and global issues, as well as environmental education, communication, recreation, ecotourism, values and ethics. Lab sessions focus on in-depth case studies and applied social science techniques.

ENST 370

ENVIRONMENTAL MANAGEMENT (4)

This course is a survey of management techniques used in the environmental profession. The management of business, industry, and natural resources is emphasized.
