

BIOLOGY COURSES (BIOL)

BIOL 101 **BIOLOGICAL INQUIRY (4)** In this course, students will explore a topic in biology as impetus to learn about scientific discovery. The primary emphases in this course include: scientific ways of knowing, causal and correlational relationships, reasoning, and interpreting data from either personal or published data

BIOL 111 **ORGANISMS, ECOLOGY, AND EVOLUTION (3)**
Corequisite: BIOL 111L. Three hours lecture. The emphasis of this course is on the fundamentals of the relationships among organisms and their environment. This course serves primarily as the first part of a two-semester introduction for those students planning to major in biology or biomedical sciences.

BIOL 111L **ORGANISMS, ECOLOGY, AND EVOLUTION LABORATORY (1)** *Co-requisite: BIOL 111.* Three hours laboratory to accompany BIOL 111.

BIOL 112 **CELLS: GENETIC AND MOLECULAR PERSPECTIVES (3)** *Corequisite: BIOL 112L.* Three hours lecture. Understanding of organismal structure and function is based on knowledge of the underlying cellular and molecular structure and function. These in turn are controlled by the genetic mechanisms that determine cellular structure and behavior. The relationships among cells, molecules, and their genetic controls are the focus of this course. This course serves primarily as the second part of a two-semester introduction for those students planning to major in biology or biomedical sciences.

BIOL 112L **CELLS: GENETIC AND MOLECULAR PERSPECTIVES (1)** *Corequisite: BIOL 112.* Three hours laboratory to accompany BIOL 112.

BIOL 205 **PLANT BIOLOGY (4)** *Prerequisites: BIOL 111/111L-112/112L or ENVS 101/101L-102/102L.* Three hours lecture and three hours laboratory. This course examines the evolution, structure, function, physiology, basic ecology, and life histories of organisms traditionally studied in the context of botany, including photosynthetic bacteria, protists, plants, and fungi. Labs complement lecture content, providing opportunities to gain skills in microscopy, morphology, ecology, and classification.

BIOL 210 **ANIMAL BIOLOGY (4)** *Prerequisites: BIOL 111/111L-112/112L or ENVS 101/101L-102/102L* Three hours lecture and three hours laboratory. Introduction to the structure, function, and ecology of the major groups of protozoans and animals within the context of a modern phylogenetic perspective. Special emphasis is placed on the modification of structure and function by natural selection within different animal groups as adaptations to specific physiological and ecological constraints.

BIOL 214 **HUMAN ANATOMY (3)** Three hours lecture. This course is a study of the structures of the body with emphasis on the organ systems involved in movement. Introductory material focuses on terminology, examining the hierarchical organization of the body and study of the four major tissues of the body. Subsequently, the interrelationships among the bones, joints, muscles, nerves, and blood supply of each body region are examined using a regional approach. This course is designed to meet the outcomes expected for pursuing upper-level courses in the HMSR majors.

BIOL 214L **HUMAN ANATOMY LABORATORY (1)** *Prerequisite or co-requisite: BIOL 214.* Three hours laboratory. The primary goal of the laboratory course is to provide a hands-on opportunity for students to apply the terminology and concepts covered during lecture. Accordingly, physical models, dissection, computer software, and Internet resources are used as part of a problem-solving pedagogy in which collaborative learning is emphasized.

BIOL 215 **HUMAN PHYSIOLOGY (3)** Three hours lecture. This course is a study of the function, integration, and interaction of various organ systems in the body. Introductory material focuses on an overview of organ systems, the concepts of homeostasis and negative feedback, and fundamental chemical, physical, and cellular concepts. Subsequently, the physiology of the systems involved in movement and exercise, particularly the nervous, endocrine, muscular, cardiovascular, pulmonary, digestive, and urinary systems are emphasized. This course is designed to meet the outcomes expected for pursuing upper-level HMSR major courses.

BIOL 215L **HUMAN PHYSIOLOGY LABORATORY (1)** *Corequisite or prerequisite: BIOL 215.* Three hours laboratory. The primary goal of the laboratory course is to provide a hands-on opportunity for students to apply the principles and concepts covered during lecture. Accordingly, physiological experiments, physical models, computer software, and Internet resources are used as part of inquiry-based, problem-solving pedagogies in which collaborative learning is emphasized.

BIOL 220 **CELLULAR DIVERSITY (4)** *Prerequisites: C- or better grade in BIOL 111 & 112, CHEM 103 & 105L.* Three hours lecture and three hours lab. This course introduces the student to the connectivity between all cellular forms of life, with its primary focus being the kingdoms of fungi and protists and their evolution from and parallel to prokaryotic organisms (bacteria and archaea). Specific topics include systematics and evolution, endosymbiosis, evolution from single to multi-celled life, and molecular aspects of communication and cell structure. Students will integrate a cellular view into their understanding of biology. Laboratories focus on microscopy, histology, and basic culture, molecular and biochemical techniques for cells.

BIOL 222 **HUMAN ANATOMY AND PHYSIOLOGY I (3)** Three hours lecture. This course explores the fundamental structure and function of the human body, beginning at the cellular and molecular level of organization and progressing through integumentary, skeletal, nervous, and endocrine systems.

BIOL 222L **HUMAN ANATOMY AND PHYSIOLOGY LABORATORY I (1)** *Prerequisite or corequisite: BIOL 222.* Three-hour laboratory to accompany BIOL 222.

BIOL 223 **HUMAN ANATOMY AND PHYSIOLOGY II (3)** *Prerequisite: BIOL 222.* Three hours lecture. This course explores fundamental structure and function of muscular, cardiovascular, pulmonary, digestive, renal, and reproductive systems in human beings. Emphasis is placed on interrelatedness of organ systems and applications to allied health professions.

BIOL 223L **HUMAN ANATOMY AND PHYSIOLOGY LABORATORY II (1)** *Prerequisite or corequisite: BIOL 223.* Three-hour laboratory to accompany BIOL 223.

BIOL 233 **TROPICAL BIOLOGY (1-3)** *Prerequisites: BIOL 111/111L-112/112L, ENVS 101/101L-102/102L or equivalent.* This course examines extremely diverse ecosystems of the tropical forests which provide excellent opportunities to study several basic concepts of biological and environmental science. Students also study the unique fauna and flora of the tropical forest and learn how and why this ecosystem is threatened.

BIOL 238 **INTRODUCTION TO RESEARCH (1-3)** *Prerequisite: Consent of supervising instructor.* This course provides the beginning student the opportunity to conduct lab, field, or library research under the supervision of a faculty member. Credit is dependent upon the scope of the work.

BIOL 305 **PLANT ECOLOGY (4)** *Prerequisites: BIOL 205/205L, MATH 103 and 222.* Three hours lecture and three hours laboratory. This course focuses on ecological constraints that plants experience by virtue of their predominantly sessile lifestyle. Populations dynamics, competition, plant-animal interactions, community structure, function, succession, and the influence of abiotic factors will be considered. Lab exercises emphasize problem-solving approaches to a series of field investigations.

BIOL 309 **ENVIRONMENTAL ENTOMOLOGY (4)** *Prerequisites: BIOL 111/111L-112/112L or ENVS 101/101L-102/102L, or by consent of instructor (BIOL 210 recommended).* Three hours lecture and three hours laboratory. An introduction to insect structure, function, adaptation, and ecology, with an emphasis on insect interactions with their natural environments and with humans. Students will be trained in insect, sampling, curation, and identification during labs, lectures, and field trips. The utility of insects in assessing the health of terrestrial and aquatic ecosystems (biomonitoring) will be a key component of the course.

BIOL 310 **ORNITHOLOGY (4)** *Prerequisites: BIOL 111/111L-112/112L or ENVS 101/101L-102/102L or consent of instructor (BIOL 210 recommended).* Three hours lecture and

three hours laboratory. Introduction to avian biology with an emphasis on the evolution, classification, physiology, behavior, ecology, natural history, and conservation of birds. Laboratory focuses on anatomical adaptations and biodiversity, as well as on field identification of birds of the Mid-Atlantic States with field trips to local and regional areas.

BIOL 313 **MARINE BIOLOGY (4)** *Prerequisites: BIOL 111/111L-112/112L or ENVS 101/101L-102/102L.* Three hours lecture and three hours laboratory. This introduction to the marine environment emphasizes the influence of oceanographic, evolutionary, and ecological principles on marine organisms and ecosystems. Discussion of the diversity of marine life focuses on the constraints of different marine ecosystems. Students gain experience in field identification of marine organisms during the laboratory. The laboratory is conducted at selected sites on the ocean and in the estuary. A small additional cost will be incurred for a field trip.

BIOL 314 **BIOLOGY OF WEST INDIAN CORAL REEF ORGANISMS (3) (Winter Term)** *Prerequisites: BIOL 111/111L or ENVS 101/101L or consent of instructor.* This course covers the organisms inhabiting the coral reefs of the West Indies and will be taught on San Salvador Island in the Bahamas. Field work is intensive, and skin diving and optional scuba techniques are employed. Limited collections are made, and a paper on a topic of special interest is required. An additional fee will be charged to cover expenses.

BIOL 321 **GENERAL ECOLOGY (4)** *Prerequisite: BIOL 111/111L-112/112L, ENVS 101/101L-102/102L, or MATH 103 and 222.* Three hours lecture and three hours laboratory. This course is a survey of general ecological principles from the evolutionary perspective, incorporating multiple levels of analysis (e.g. population, community, etc.). Primary emphasis is placed on framing ecological theory in perspective with field models of ecological principles from historical and current research.

BIOL 323 **GENETICS (4)** *Prerequisites: BIOL 111/111L-112/112L, ENVS 101/101L-102/102L, or CHEM 103/105L-104/106L.* Three hours lecture and three hours laboratory. Basic concepts and principles of prokaryotic and eukaryotic genetics are discussed, including Mendelian inheritance, polygenic inheritance, linkage and mapping chromosome aberrations, population genetics, DNA structure and replication, gene expression, mutation, gene regulation, recombinant DNA technology, and the molecular basis of disease. Lab exercises utilize bacteria, plants, and animals as model systems.

BIOL 332 **VERTEBRATE ANATOMY (4)** *Prerequisites: BIOL 111/111L-112/112L. (BIOL 210 recommended).* Three hours lecture and three hours laboratory. This course provides a comparative study of the development, structure, and relationships of different organ systems in various vertebrate groups. Recommended for pre-medical, pre-dental, and medical technology students.

BIOL 333 **VERTEBRATE PHYSIOLOGY (4)** *Prerequisites: BIOL 111/111L-112/112L, CHEM 103/105L-104/106L. (BIOL 210 recommended).* Three hours lecture and three hours laboratory. This course is a study of the cellular and molecular bases of organ system function in vertebrates, primarily humans. Emphasis is placed on nervous and endocrine control systems and the coordination of body functions. Clinical examples are frequently used.

BIOL 345 **ANIMAL BEHAVIOR (4)** *Prerequisites: BIOL 111/111L-112/112L, ENVS 101/101L-102/102L or MATH 103 and 222.* Three hours lecture and three hours laboratory. This course includes a review of concepts of animal behavior and the methods employed to study behavior including an analysis of mechanistic and adaptive aspects of behavior in a variety of animal taxa. Emphasis is placed on analysis of current primary literature and development of critical tests of behavior.

BIOL 356 **NEUROBIOLOGY (4)** *Prerequisites: BIOL 111/111L-112/112L (BIOL 220 recommended).* Three hours lecture and three hours laboratory. This course serves primarily as a companion course to *Physiological Psychology* (PSYC 355) but can also serve as a stand-alone course for anyone interested in the biology of the human nervous system. Introductory material focuses on an overview of the organization of the nervous system and on cellular aspects of neural function. Subsequent emphasis is on reflexes, sensory function, motor function, and sensorimotor integration.
