BUAD 100 PERSPECTIVES ON BUSINESS (3) This course presents basic concepts and problems found in business. Topics such as marketing, organizational forms, management, production, finance, and economics are discussed. The business environment is also emphasized, including the global, social, ethical, political, legal, and regulatory business environment. Team-building skills are strongly emphasized and developed.

BUAD 241 BUSINESS STATISTICS (3) *Prerequisite: General Education MATH; strongly recommend MATH 103.* This course focuses on the development of the theory of inferential statistics with the aim of generating an understanding of the selection, application, and interpretation of statistical methodology necessary for making informed management decisions. Topics include sets and probability, probability distributions, expected value, statistical measures, sampling distributions, estimation, and hypothesis testing. NOTE: School of Business and Economics majors will not meet the statistics requirement by substituting MATH 222 for BUAD 241.
