

SCHOOL OF BUSINESS AND ECONOMICS

DR. JOSEPH H. TUREK, PH.D., DEAN

VISION

The Lynchburg College School of Business and Economics is committed to being one of the top ten private schools for student learning, scholarship, and character development, providing innovative, challenging, professional education firmly rooted in the liberal arts tradition. The programs of the School are approved by the Association of Collegiate Business Schools and Programs (ACBSP).

MISSION STATEMENT

Engaging students through active learning to build character and advance knowledge.

M.B.A. PROGRAM GOALS AND OBJECTIVES

To prepare students for the challenges of the twenty-first century, the M.B.A. curriculum offers in-depth knowledge of the business core—accounting, finance, marketing, management, management information systems, and operations management—and integrates important competencies of ethics, leadership, globalization, communication, and information technology. Substantive, integrative knowledge and competencies in these areas will prepare graduates of the Lynchburg College M.B.A. program to meet the challenges of a changing world.

The M.B.A. program provides full- and part-time options. The full-time student can complete the program in fourteen months. Those who attend part time can complete the program in a minimum of twenty-one months.

At the end of the program, M.B.A. students will:

Goal 1: Collaboratively diagnose and analyze organizational problems using a business process model to formulate strategies for continuous improvement.

Objective 1: Through use of a business process model and creative and critical thinking skills, students will analyze case studies and real organizational problems that involve the functional integration of organizational behavior, managerial accounting, marketing management, managerial economics, managerial finance, and operations management.

Objective 2: Using case studies and projects, students will analyze the influence of political, social, legal, and environmental issues to formulate strategies that solve organizational problems and assess their performance.

Objective 3: Using case studies and projects, students will evaluate global, cultural, leadership, and ethical issues that managers face when making strategic decisions and solving organizational problems.

Objective 4: Using team process skills, students will work together to make effective decisions and solve problems and to incorporate divergent points of view into their analysis and conclusions.

Goal 2: Use information technology to make complex business decisions.

Objective 1: Students will use information technology and complex quantitative methodologies and tools to analyze data for the support of managerial decisions.

Objective 2: Students will leverage technology to overcome business challenges and opportunities.

Goal 3: Effectively communicate technical material and analysis to different professional constituencies.

Objective 1: Students will recognize their professional audience and target their written and oral reports accordingly.

Objective 2: Students will write professional-quality reports and memos that synthesize, apply, and present business concepts that reflect a graduate-level understanding of the materials.

All M.B.A. students must take a capstone course (i.e., MBA 690) that includes a group project that is designed to have students integrate and apply concepts learned in all their core courses. This group project is evaluated both by faculty and external peer reviewers (i.e., business and organizational leaders in the community).

The requirements for students relative to retention in the program (academic standards), graduation (including the time frame for degree completion), transfer credit, and withdrawal are provided in the prior section on Academic Regulations. Students follow the prescribed course of study as listed. Their progress is monitored on the School of Business and Economics course completion form.
